PROFESSIONAL SUMMARY

Detail-obsessed Frontend Developer actively expanding into full-stack engineering, dedicated to building clean, modern, and scalable web applications where design, interactivity, and functionality converge seamlessly. Proficient in engineering intuitive client-side architectures using **React.js**, **Next.js (App Router)**, **TypeScript**, and **Tailwind CSS**, complemented by strong foundations in **Shadcn UI**, **Motion**, and **state management (Zustand, Redux Toolkit)**. Passionate about coding with intent and delivering pixel-perfect, accessible, and high-performance digital experiences.

EDUCATION

Aggarwal College, Maharshi Dayanand University

Master of Computer Applications (MCA)

Haryana, India

2026–2028

DAV Centenary College, Maharshi Dayanand University

Bachelor of Computer Applications (BCA) — First Division

Haryana, India

2023–2026

PROJECTS

RidePlus | Next.js 14 (App Router), TypeScript, Tailwind CSS, Mapbox GL, WebSockets, Clerk Auth, AWS S3

[Live Link](#)

- Architected an intelligent carpooling frontend allowing commuters to discover, book, or publish intercity rides with real-time fair-share fuel cost calculations.
- Integrated **Mapbox GL & Directions API** for live polyline navigation, interactive route distance calculations, and visual waypoint selection.
- Engineered a real-time driver-rider messaging layer utilizing **WebSockets** for instant low-latency trip coordination and status alerts.
- Implemented secure user onboarding and authentication with **Clerk Auth**, maintaining client session state and protected application routes.
- Designed an AI-assisted query interface integrating **Google Gemini AI & LangChain** to resolve ride schedules, FAQs, and routing details.

Cosmo E-Commerce | JavaScript (ES6+), HTML5 Semantic UI, CSS3 Grid & Variables, Tailwind CSS, LocalStorage State Engine

[Live Link](#)

- Engineered a modern high-end fashion e-commerce storefront featuring an interactive editorial hero lookbook with clickable pricing hotspots (Rs. 1,499 & Rs. 2,299).
- Curated a high-density 12-piece apparel catalog grid (dresses, knitwear, tailored trousers, bags) with hover state transitions and quick-view actions.
- Developed large-format editorial photography cards segmenting core collections in an intuitive visual department lookbook ("Don't Shop Around").
- Architected client-side persistent cart and wishlist state engines leveraging **LocalStorage** to synchronize items, quantity counters, coupons, and subtotals across browser tabs.
- Built a touch-optimized mobile drawer mega-navigation classifying departments (Ladies, Men, Kids, Home) with instant search integration.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, Java, HTML5, CSS3

Frontend Frameworks: React.js, Next.js (App Router), Tailwind CSS, Shadcn UI, Motion (Framer Motion)

State Management: Zustand, Redux Toolkit, Context API, LocalStorage State Engines

Web Architecture: Component-Driven Architecture, REST API Integration, Responsive Design, Web Accessibility (a11y)

Developer Tools: Git, GitHub, Vercel, VS Code, Cursor, Antigravity, Gemini AI

KEY COMPETENCIES & COURSEWORK

- Core Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems, Web Engineering.
- Frontend Philosophy:** Writing clean, modular code with intent; crafting scalable, pixel-perfect interfaces where aesthetics and functionality converge.
- Performance & Standards:** Dedicated to semantic markup, Core Web Vitals optimization, asset lazy-loading, and mobile-first responsive architecture.
